

GIA NATURAL DIAMOND GRADING REPORT

September 09, 2026
GIA Report Number 6565248155
Shape and Cutting Style Cushion Modified Brilliant
Measurements 10.48 x 6.34 x 4.03 mm

GRADING RESULTS

Carat Weight 2.22 carat
Color Grade D
Clarity Grade Flawless

ADDITIONAL GRADING INFORMATION

Polish Excellent
Symmetry Excellent
Fluorescence None
Inscription(s): GIA 6565248155

GIA REPORT 6565248155

DIAMOND TYPE CLASSIFICATION FOR GIA DIAMOND GRADING REPORT #6565248155

Scientists classify diamonds into two main "types" - type I and type II - based on the presence or absence of nitrogen which can replace carbon atoms in a diamond's atomic structure. These two diamond types can be distinguished on the basis of differences in their chemical and physical properties. Type II diamonds contain little if any nitrogen and they are subdivided into two groups (IIa and IIb) both of which are quite rare (less than 2% of all gem diamonds).

According to the records of the GIA Laboratory, the 2.22 carat Cushion Modified Brilliant diamond described in GIA Diamond Grading Report #6565248155 has been determined to be a **type IIa** diamond. Type IIa diamonds are the most chemically pure type of diamond and often have exceptional optical transparency. Type IIa diamonds were first identified as originating from India (particularly from the Golconda region) but have since been recovered in all major diamond-producing regions of the world.

Among famous gem diamonds, the 530.20 carat Cullinan I and the 105.60 carat Koh-i-noor are examples of type IIa.
